1 With the HORUS 11 and NERIUS 11 chainrings you can change a 10 speed crankset into an 11 speed crankset, but only if these cranksets are compatible with the HORUS, VENTO or NERIUS chainring.

2 You need to install the inner chainring with the Spécialités T.A. screw UTC3 kit.

3 To change the inner chainring, you have to replace the original outer chainring by a Spécialités T.A. chainring.

4 To change the original inner chainring (PCD 92 mm), you have to replace the middle chainring by an Alizé-K.

5 This chainring helps you to get your 10 speed crankset in 11 speed crankset.
